

BUG HOTEL

Make your own bug hotel for your neighbourhood.

Roof made out of old tiles (wood works too).

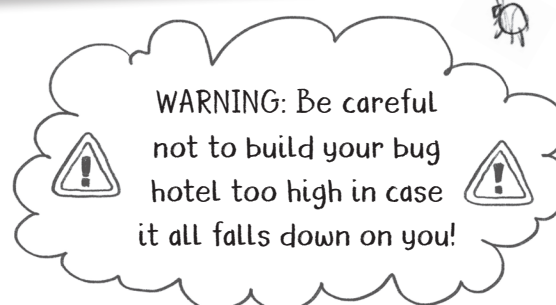

DRY STICKS, LEAVES, STRAW AND BARK
Beetles, woodlice, ladybirds and spiders like to live here.

ROLLED-UP CARDBOARD
Insects such as lacewings shelter here.

BAMBOO
Some solitary bees like to lay eggs in here.

Lottie used bricks, stones and logs as a foundation to build on.

WARNING: Be careful not to build your bug hotel too high in case it all falls down on you!
