

MAKE YOUR OWN MOTH BOX

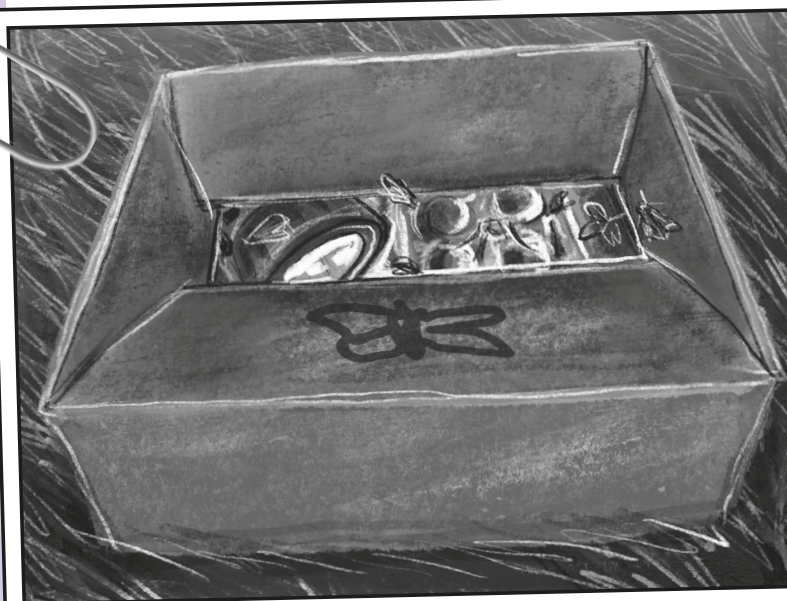

Open an egg box and tape the flat sides to the bottom of a big cardboard box. This is to give the moths something to rest on.

Then push down the flaps of the big box to make slopes.

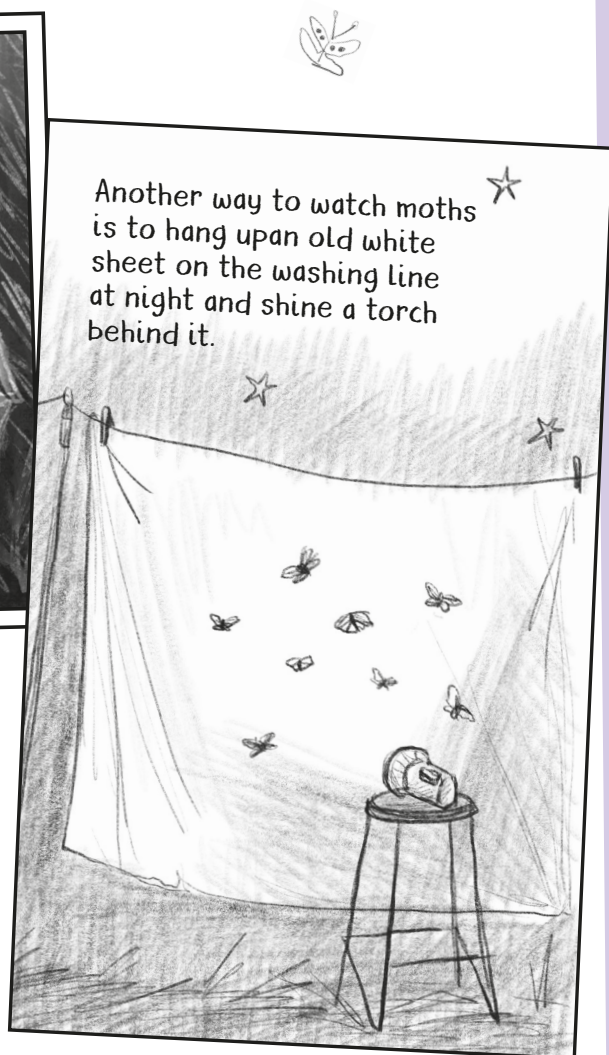

I turned on the torch and put it next to the egg box. Then I went away and left the box for 30 minutes. Lots of moths came!

NOTE: Be sure to release the moths later!

Moths' wings are very fragile so don't handle them.

Another way to watch moths is to hang up an old white sheet on the washing line at night and shine a torch behind it.
